guitar chord chart
by Jim Greeson

by Matt Harris

To play this chart, use a medium dark tone by using the neck pick-up on your guitar with the tone setting in the middle range. For most of this piece, play the specific rhythms that are notated. These rhythms are played by at least one other instrument - so listen to the group and match your playing to the rest of the ensemble. Some of the chord shapes below may be awkward to finger, feel free to leave off the note on your 6th string. Where specific rhythms are not indicated, play rhythms that are similar to the previously notated rhythms. Occasionally you can also pick a few single string notes to help the chords sustain. At measure 49, there is a guitar solo; a blues scale will fit these chords well. I suggest playing the solo with a bit of restraint and soul rather than blasting out your flashiest blues licks.

Many of these chord voicings omit one or more strings; you will have to be careful to dampen them so they don't sound when you strum the chords. This can usually be done by letting a finger on an adjacent string lean over just enough to dampen the string that isn't supposed to be heard.

LEGEND

NUMBERS IN CIRCLES refer to left hand fingers with the index finger numbered 1.
NUMBERS IN BOXES to the left of the fingerboard diagram indicate at which fret the fingering should be played.
"X" marks strings that should be damped and not played.
